

Benefits of Radiant Electric Heat

- Save up to 73% in energy costs over other traditional heating methods.
- Simple low cost installation; no ductwork or venting. Installs as easy as a light fixture.
- Comfortable at lower thermostat settings; heats people first then the air.
- Area by area zone control provides economical comfort only where you need it.
- Works great with setback thermostats; rapid recovery times raise temperatures into comfort zones in minutes not hours.
- Energy efficient replacement for high intensity electric or direct-fired gas heating units in industrial, warehouse and enclosed outdoor applications where high air turn-over is not present.
- Reliable – Offers decades of service and a 10 Year non-prorated limited warranty.
- Extremely clean; no danger of asphyxiation and perfect for those with allergies and/or chemical sensitivities.
- Exceptionally safe low operating temperature eliminates the risk of fires and personal injury.
- Suitable for commercial, institutional industrial and residential applications.
- Radiant Electric Heat proudly manufactures our efficient line of infrared radiant heaters 100% in the USA.
